

Perm Tex Vapor Barrier Submittal Sheet

Perm Tex Primer is a fast drying perm rated texture primer specifically formulated to treat the finished surface of gypsum drywall installations prior to texturing. The benefits include excellent hide, fast drying, superior coverage and easy clean-up.

Usages: When Applied at a thickness of 4 mils WFT, Perm Tex Primer will reduce the amount of moisture vapor transfer and provide a perm rating of less than 1.

Job Conditions: Mix thoroughly before use. A minimum application temperature of 50* F (10* C) must be maintained throughout application. Perm Tex Primer dries to the touch within 7 to 20 minutes. Allow surface to dry completely before decorative material is applied.

Surface Conditions: Surface must be sound, clean, dry and free of dirt, dust, sanding dust, chalk, oil, grease, wax, mildew and/or any other contaminants.

Mixing: Mix by stirring. Power mixing is not recommended.

Equipment: Airless application is recommended with a tip size of .006" to .021" at an air-pressure between 1800 and 2200 psi.
